Work Experience

Front-End Developer

030labs • Full-time • Sep 2022 - Apr 2023 (8 months)

- Developed Web3 components for company projects, ensuring the creation of maintainable code
- Refactored a variety of products using modern technologies, significantly enhancing accessibility and achieving an 18% performance boost
- Collaborated daily with cross-functional teams to guarantee seamless project execution

Freelance Web Developer

Self-employed • Feb 2020 - Sep 2022 (2 years 8 month)

- Developed responsive user interfaces using vanilla JavaScript and CSS preprocessors
- Engineered robust back-end solutions through the development of Django applications

Projects

My Portfolio: I designed and developed a responsive personal portfolio using modern technologies, showcasing my front-end development skills with interactive elements for user engagement.

Mu Protocol: Mu Protocol is a distributed, decentralized cloud provider marketplace. Mu allows infrastructure providers to offer their servers for sale in a standardized and secure way.

Metaroom: Gateway for traditional tourism, short or long-term rental into Web3 for a unique travel community of digital nomads and remote workers.

Education

Master: Software Engineering • Payam Noor University of Tehran • 2023 - Present
Bachelor: Computer Engineering • Sirjan University of Technology • 2017 - 2021
